2. The attached reports of disposition have been prepared based on a review of the Real Property Report for the Base of 30 June 1963 and the records of quarters and safehouses currently in use which reveal that: (A) Living quarters were reported which were originally leased under [redacted], however there is no record of termination report having been made when the employee departed PCS; (B) Living quarters coming within [redacted] are reported as disposed of in order to correct the records since we do not believe these quarters are considered Government quarters; (C) Terminated safehouses on which there is no record of termination notification. In some instances there is no record of a Form 360 having been submitted initially when the property was leased.
